# FastPach™ PalmScan P2000 FastPach Pachymeter

## Accurate, Reliable, Low Cost Pachymetry

The PalmScan P2000 FastPach Pachymeter is the highest performance pen pachymeter available on the market today.

This lightweight, easy to use device includes exclusive features that are not available on any other device in its category.

Only the FastPach Pachymeter provides the most accurate CCT measurements in about 1 second using state-of-art Signal Processing algorithms. The Confidence indicator will ensure you the measurements are done right. The intuitive user interface and one-touch controls makes operation of the device extremely easy.

With the optional Bluetooth Interface feature, you can wirelessly transfer your corneal thickness measurements to your PC, perform IOP adjustment calculations and print informative, color coded reports for each patient.

Example of FastPach™ Pachymeter Software

## FastPach™ Features

- Lightest and Smallest Pachymeter – at only 2.5 oz or 71 grams, it is the smallest and lightest pachymeter on the market
- Highest Probe Frequency – ensures ease of measurement and superb accuracy
- Advanced Battery Technology - Rechargeable lithium ion battery keeps the FastPach ready to use. Charge the battery with the provided international charging adapter
- Intuitive User Interface
- Easy to read display
- Bluetooth interface to PC for seamless print and “Adjusted IOP” Calculations (Optional)
- Ergonomic Design - Lightweight, ergonomic design fits comfortably in your hand
- 3 Year Warranty – Industry leading 3 year warranty gives you peace of mind
- ADA Eligibility- Purchase of your FastPach may qualify you for an ADA tax credits

## Benefits

- High Frequency Probe - 50 MHz
- Capable of Measuring diseased cornea
- Rechargeable Lithium-Ion Battery
- Easy to Operate
- Portable

## Specifications

ACCURACY	± 4 μm
RESOLUTION	± 1 μm
RANGE	250-999 μm
POWER DISSIPATION	150 mW
PROBE FREQUENCY	50 MHz

Proudly made in the U.S.A.
